

South Kesteven District Council is doing all it can to help residents deal with the rising cost of living.

We have created an online hub, packed with information and pointers towards partners and experts that can provide targeted help: <http://www.southkesteven.gov.uk/costofliving>

This includes advice on benefits, food and housing costs, mental wellbeing and energy saving.

In addition, SKDC is leading a county-wide 'Warm Spaces' working group. The group will be focusing on warm space provision within the county and ensuring actions are undertaken to publicise the warm space.

**SKDC and the working group are currently looking at the best way a venue can register as a warm space and receive the support they need to set up the warm space safely. More information will be sent to you very soon. In the meantime, we would ask that you start to consider what warm and welcoming venues operate in your parish – either by the parish council or by private organisations in your parish.**

We realise that room sizes and facilities will vary but hope you will be able to give this appeal for support your full consideration and keep in close contact with us on this and any other related community initiatives.

Kind regards,

**Cost of Living - Strategic Working Group**
